- [Almost all WannaCry victims were running Windows 7](#) [3]

According to data released today by Kaspersky Lab, roughly 98 percent of the computers affected by the ransomware were running some version of Windows 7, with less than one in a thousand running Windows XP. 2008 R2 Server clients were also hit hard, making up just over 1 percent of infections.

- [NHS cyber-attack causing disruption one week after \[Windows\] breach](#) [4]

Operations and clinic appointments were cancelled and patients were still being diverted from accident and emergency departments on Thursday.
