Whats up everyone? I was just taking a look at Google Trends and I found out something interesting. Apparently Ubuntu Linux has not only surpassed its major competitor in Linux (SuSE) in popularity, as well as the distro it's based off of (Debian) , but it seems to have also surpassed another major competitor.

Yes, that's right! Apple Computer's very own Mac OS X has also been defeated in popularity by Ubuntu! Check it out for yourself. Here is a screenshot I took not 15 minutes ago.
