Powered by the Linux 4.13.12 kernel, OpenMandriva Lx 3.03 is an enhancement to the previous OpenMandriva Lx 3 releases, adding major improvements to the boot process. The OS also uses the Mesa 17.2.3 graphics stack with S3TC support enabled, the X.Org Server 1.19.5 display server, and systemd 234 init system.

On the user-visible side of changes, OpenMandriva Lx 3.03 ships with the KDE Plasma 5.10.5 desktop environment and KDE Frameworks 5.39.0 software stack, along with the latest Firefox Quantum web browser compiled with LLVM/Clang 5.0.0 and Calamares 3.1.8 as default graphical installer.
