- [What's New in Manjaro 18.0 Deepin Desktop Edition](#) [3]

Manjaro 18.0 Deepin Edition is official Manjaro Linux flavour with Deepin Desktop Environment 15.8 as default desktop environment includes several deepin applications a free open source software.

Manjaro 18.0 Deepin Edition is powered by the latest Long-Term Support of Linux Kernel 4.19, include pamac version 7.3. in manjaro 18.0, The Manjaro Settings Manager (MSM) now provides an easy-to-use graphical interface for installing and removing the many series of kernels. At the time of this release, eight kernel-series are available directly from manjaro binary repositories, from 3.16 series to the latest 4.19 release.

- [Open Source Security Podcast: Episode 142 - Hypothetical security: what if you find a USB flash drive?](#)[4]

Josh and Kurt talk about what one could do if you find a USB drive. The context is based on the story where the Secret Service was rumored to have plugged a malicious USB drive into a computer. The purpose of discussion is to explore how to handle a situation like this in the real world. We end the episode with a fantastic comparison of swim safety and security.

#### [Episode 64 | This Week in Linux](#) [5]

On this episode of This Week in Linux, we got a lot of releases week. Ubuntu and all of the Flavours have released 19.04 versions along with an interesting update from the Ubuntu derivative Pop!\_OS. The KDE Community announced the availability of a bunch of new versions of various KDE Applications.

#### [Linux Gaming News Punch - Episode 9](#) [6]

Coming in hot (please save me from this heat) is the ninth episode of the Linux Gaming News Punch, your weekly round-up of some interesting bits of news.

For regular readers, as always this might not be too helpful but for those who don't visit too often this should help keep you updated.

#### [Linux Action News 102](#) [7]

Ubuntu 19.04 is released we share our take, OpenSSH has an important release, and Mozilla brings Python to the browser.

Also WebThings is launched and we think it might have a shot.

#### [GNU World Order 13x17](#) [8]

#### [Talk Python to Me: #208 Packaging, Making the most of PyCon, and more](#) [9]

Are you going to PyCon (or a similar conference)? Join me and Kenneth Retiz as we discuss how to make the most of PyCon and what makes it special for each of us.
