As I write this, Bloomberg has learned that other U.S.-based tech giants like Intel, Qualcomm and Broadcom will cut off their supply of components to Huawei. Losing access to Intel processors will obviously affect future Huawei laptops, but what about the operating system Huawei will ship on these devices? What about the installation of Windows 10 you currently have on your Huawei laptop?

[...]

Linux Out Of The Box?

We know that Huawei has prepared for this situation by developing its own in-house alternative operating systems to both Android and Windows, though the state of said development is unknown.

Its Windows alternative is almost certainly a custom Linux distribution. And it's not far-fetched to speculate that Huawei has it playing nicely on its own processors.
