The feature-packed and long-desired ZFS On Linux 0.8 release has finally taken place! ZoL 0.8 is out there!

ZFS On Linux 0.8 has debuted today as the newest feature release for this ZFS file-system port for Linux systems. ZFS On Linux 0.8 supports up through the latest Linux 5.1 stable series while still working going back to the Linux 2.6.32 kernel days, but the SIMD support isn't available on stock 5.0+ kernels leading to big performance penalties.
