With the focus given to Huawei's US ban, there has also been some discussion about Android, Google's hold on the platform, and truly free (as in freedom) alternatives to the world's biggest mobile OS. There has never been a shortage of alternative mobile platforms, many of them revolving around Linux, but there has been a dearth of companies making devices that run and support such platforms. Pine64 is one of those few and it is now sharing some development in its quest to make a privacy-respecting open source smartphone.
