- [Why does macOS Catalina use Zsh instead of Bash? Licensing](#) [3] [iophk: "s/patents/software patents/g; :('"]

So, it's no surprise that Apple's moving its users away from Bash. I'm also not surprised to see Apple favor Zsh. For starters, it's licensed under the MIT License, and therefore doesn't contain the controversial language surrounding patents and Tivoization.

- [The Redmi S2, aka Y2, gets its Android Pie update](#) [4]

That may not be a huge deal to some users, however. Xiaomi is also obliged to release the S2/Y2's kernel sources in order to remain compliant with GNU's general public licence.
