- [Adrien Plazas: libhandy 0.0.10](#) [2]

libhandy 0.0.10 just got released, and it comes with a few new adaptive widgets for your GTK app.

- [FOSS Project Spotlight: OpenNebula](#) [3]

With the current conversation shifting away from centralized cloud infrastructure and refocusing toward bringing the computing power closer to the users in a concerted effort to reduce latency, OpenNebula's 5.8 "Edge" release is a direct response to the evolving computing and infrastructure needs, and it offers fresh capabilities to extend one's cloud functionality to the edge. Gaming companies, among others, who have been using OpenNebula were of the first to push for these features (yet they don't have the be the only ones to benefit from them).

- [Cockpit 196](#) [4]

Cockpit is the modern Linux admin interface. We release regularly. Here are the release notes from version 196.

-

[bibisect-linux-64-6.4 is available with KDE5 support!](#) [5]

The LibreOffice Quality Assurance (QA) Team is happy to announce the bisect repository from libreoffice-6-3-branch-point to latest master is available for cloning from Gerrit. As a novelty, this repository adds support for KDE5 environment.
