# Hack Computer review

By *Roy Schestowitz*

Created 17/06/2019 - 1:37pm

Submitted by Roy Schestowitz on Monday 17th of June 2019 01:37:15 PM Filed under [GNU](#) [1] [Linux](#) [2] [Hardware](#) [3] [Reviews](#) [4]

I bought a hack computer for \$299 - it's designed for teaching 8+ year olds programming. That's not my intended use case, but I wanted to support a Linux pre-installed vendor with my purchase (I bought an OLPC back in the day in the buy-one give-one program).

I only use a laptop for company events, which are usually 2-4 weeks a year. Otherwise, I use my desktop. I would have bought a machine with Ubuntu pre-installed if I was looking for more of a daily driver.
