Submitted by Roy Schestowitz on Wednesday 19th of June 2019 04:11:17 PM Filed under [Development](#) [1]

Today, we have released Qt 5.13 and I'm really proud of all the work that everyone has put into it. As always, our releases come with new features, updates, bug fixes, and improvements. For Qt 5.13, we have also been focused on our tooling that makes designing, developing and deploying software with Qt more efficient for designers and developers alike. Let's take a look at some of the highlights of Qt 5.13 as well as some of the updates on the tooling side.

I will also be holding a webinar summarizing all the news around Qt 5.13 together with our Head of R&D Tuukka Turunen on July 2. Please sign up and ask us your questions.
