# Clear Linux with Gnome 3.32

By *Roy Schestowitz*

Created *11/07/2019 - 11:06am*

Submitted by Roy Schestowitz on Thursday 11th of July 2019 11:06:13 AM Filed under [GNU](#) [1] [Linux](#) [2] [Reviews](#) [3]

Today we are looking at a newish distro that is quickly improving and according to many podcasts and blogs it might become one of the major Linux distros soon as it has many interesting features, but it isn't perfect yet.

There are many pros to look at, firstly it is Intel's Linux distro, so it has great financial backing and support. Ikey Doherty, the guy who started Solus OS is part of the developing team of Clear Linux, as we all know he is no longer part of Solus, but he is a great developer for Clear Linux.

It is an independently based distro, so not build on one of the major distros like Debian or Arch. It uses the Gnome Desktop Environment and it uses Gnome Software Center 3.30 as Software Store. It uses Gnome 3.32 and Linux Kernel 5.1 and uses about 1.1GB of ram when idling.

The only downside of it is, that the installer is still a work in progress and a person can only install it on real hardware, not in Virtual Machines, that is the desktop version, so I made this video by using the live session, rest assured that my host system is Linux as well, so I would really like to see that they will enable us to install it on VirtualBox as well. The ISO comes in a compressed package which a person needs to extract to use the ISO.
