- [Clementine Music Player for All Your Audio Needs](#) [2]

VLC is a mainstay for most fans of FOSS technology and most Linux distros. It's a great little player, don't get me wrong, but if you have a large library of audio files, some times you need something more powerful.

The Clementine Music Player is a full-service audio player with all the tools you need to keep track of your audio library. According to the project's website, Clementine "inspired by Amarok 1.4, focusing on a fast and easy-to-use interface for searching and playing your music."

- [Episode #143: Spike the robot, powered by Python!](#) [3]

- [Bigger. Faster. Harder to Maintain. | LINUX Unplugged 314](#) [4]

It's huge, and it's getting bigger every month. How do you test the Linux Kernel? Major Hayden from Red Hat joins us to discuss their efforts to automate Kernel bug hunting.

Plus our honest conversation about which Linux works best for us.
