Knowing Ubuntu releases is important to understand it better. Ubuntu is released twice a year, more precisely, every April and October, hence the number 04 and 10 in every version. It has special release called Long Term Support (LTS) released once in two years, only when the year number is even, hence all LTS version numbers are ended with 04. More importantly, you will also see 3 different periods of Ubuntu Desktop, that have been going through GNOME2, Unity, and GNOME3 eras, with OpenOffice.org and then LibreOffice as the main office suite. You will also see Ubuntu siblings like Kubuntu and Mythbuntu. I hope this will be interesting enough for everybody to read. Go ahead, and learn more about Ubuntu!
