- [Molly de Blanc: Meet the GNOMEies: Sammy Fung](#) [2]

Sammy is a freelancer, community organizer, and GNOME enthusiast from Hong Kong. For almost 20 years, Sammy has been using, GNOME and building community in Asia.

- [Bin Li: GUADEC 2019](#) [3]

Thessaloniki is very peaceful place, every morning I liked to walk along the seaside to the venue. As usual, it was a great and enjoyable GUADEC, thanks to everyone who helped to make it.

In core days I attended a lot of great talks in this year, I learned a lot of latest status of GNOME, and here are my favorite talks, ?Managing GNOME Sessions with Systemd?, ?State of the Shell?, ?Packing up Boxes?, ?Modernizing Desktop Linux Development with Containers?, ?Is the Linux Desktop Really Dead??.

I also enjoy watching Lighting talks every year. In this year Britt Yazel?s lighting talks, I knew the GUADEC App was based on Connfa, and it?s also an open source project. This App is very convenient, I could check schedule at any time.
