- [Tencent open-sources IoT operating system TencentOS tiny](#) [2]

China's internet giant Tencent announced Wednesday that it will open-source its in-house Internet of Things (IoT) operating system TencentOS tiny, according to a company's press release.

Tencent's IoT team said that making TencentOS tiny an open-source product will allow developers in the world to share Tencent's technologies and expertise in this sector, while also allowing this system to draw innovations from worldwide, and lower the development cost of IoT applications.

- [Huawei To Invest \\$1.5 Billion To Achieve Its Open-Source Computing Ambitions](#) [3]

To bolster its growing software and hardware ecosystem, Chinese tech giant Huawei has announced that it will be making a huge investment to support third-party developers. The company announced on Wednesday that it will be investing around \$1.5 billion aimed at cultivating more developers to help it grow its open-source computing platform.

- [Huawei is about to unveil the Mate 30, its first flagship phone without Google services](#) [4]

- [Huawei unveils its own open-source software ecosystem](#) [5]

Chinese technology giant Huawei unveiled its own open-source software ecosystem yesterday with the goal of attracting global developers and players to use its system.

Huawei will invest US\$1.5 billion (S\$2 billion) in the next five years in an upgraded version of its existing developer programme. It will provide funding to universities, individuals, start-ups and enterprises to support them in learning, product development and marketing.
