SparkyLinux 5.9 "Nibiru" is out. This is a quarterly update of live/install media of the stable line, which is based on Debian 10 "Buster".

The base system has been upgraded from Debian stable repos as of October 4, 2019.

It works on the Linux kernel 4.19.67 LTS.

As usually, new iso/img images provide small bug fixes and improvements as well.

Sparky project page and Sparky forums got new skins; no big changes about the colors but they are much mobile devices friendly now.
