While Red Hat is pursuing Pipewire with plans to fill the use-cases provided by the JACK(2) low-latency audio server, JACK2 isn't letting up and Sunday marked version 1.9.13 for the project and their first release since December 2017.

JACK2 1.9.13 is primarily driven by the introduction of a meta-data API, a long-standing request with JACK1 having added a meta-data API more than six years ago.
