Linux used to be the go-to operating system among the tech-savvy crowd. Because back in the day, it was a lot more demanding to use. Now Linux has modern, user-friendly distributions such as Ubuntu and Mint. The application repository they have in common has matured too. Customizing it to your heart's desire is now easier than ever before. And this should be the end goal ? to mold the OS into a tool that's custom-tailored to your needs. So if you haven't already, consider installing the following types of applications.
