- **[Developing cross-browser extensions with web-ext 3.2.0](#)** [2]

    The web-ext tool was created at Mozilla to help you build browser extensions faster and more easily. Although our first launch focused on support for desktop Firefox, followed by Firefox for Android, our vision was always to support cross-platform development once we shipped Firefox support.

- **[Get recommended reading from Pocket every time you open a new tab in Firefox](#)**[3]

    Thousands of articles are published each day, all fighting for our attention. But how many are actually worth reading? The tiniest fraction, and they?re tough to find. That?s where Pocket comes in.

- **[This Week in Rust 308](#)** [4]

    Hello and welcome to another issue of This Week in Rust! Rust is a systems language pursuing the trifecta: safety, concurrency, and speed. This is a weekly summary of its progress and community. Want something mentioned? Tweet us at @ThisWeekInRust or send us a pull request. Want to get involved? We love contributions.
