Qt Creator 4.11 Beta released

By *Rianne Schestowitz*

Created *18/10/2019 - 2:47pm*

Submitted by Rianne Schestowitz on Friday 18th of October 2019 02:47:38 PM Filed under [KDE](#) [1]

We are happy to announce the release of Qt Creator 4.11 Beta!

We added experimental support for Qt for WebAssembly and Qt for MCUs.

We improved the general handling of configuring, building and running projects in so many smaller ways that I fail to choose anything for being highlighted here.

If you use CMake 3.14 or later we now use CMake's file-base API for configuring and parsing projects. Which behaves much more reliably than the previous server-mode, especially if you also use CMake from a terminal or other applications.
