So you bought yourself a fancy VR headset, you've played all the zombie-dragon-laser-kitten-battle games (we have too!) and now you're wondering? what else is there? Where can I find other cool stuff to explore while I have this headset strapped to my face? We felt the same way, so we built Firefox Reality to help you in your quest for the most interesting, groundbreaking and entertaining virtual reality content on the Web.

The real promise of VR is the ability to immerse yourself into countless other places and perspectives - both real and imaginary - and to experience things you've never done before. Our Top Picks page is a great place to start exploring, with fresh recommendations coming weekly so you always have new content to check out. Of course, if you want to explore on your own, you can use Firefox Reality for that too.

Firefox Reality Top Picks is the start of what we hope will evolve into a thriving and sustainable ecosystem connecting creators, VR content, and audience.
