# KDevelop 5.4.3 released

By *Rianne Schestowitz*

Created 21/10/2019 - 5:32pm

Submitted by Rianne Schestowitz on Monday 21st of October 2019 05:32:31 PM Filed under [KDE](#) [1]

We today provide a stabilization and bugfix release with version 5.4.3. This is a bugfix-only release, which introduces no new features and as such is a safe and recommended update for everyone currently using a previous version of KDevelop 5.4.

You can find the updated Linux AppImage as well as the source code archives on our download page.
