Released last week on October 15th, the KDE Plasma 5.17 desktop environment introduces Night Color support on X11, fractional scaling on Wayland, HiDPI and multi-screen improvements, as well as the ability to support for managing and configuring Thunderbolt devices in System Settings.

It also improves the notification system with a new Do Not Disturb mode that automatically detects presentations, Breeze GTK theme support for the Google Chrome and Chromium web browsers, Nvidia GPU stats in System Settings, and color scheme support for GTK and GNOME apps in the Breeze GTK theme.
