- [openSUSE Tumbleweed ? Review of the week 2019/43](#) [2]

This week it has been another three snapshots released upon the users. There were some updates, as usual, and a larger stack has been removed from Tumbleweed, after weeks of preparation. The three snapshots released were 1018, 1022 and 1023

- [Webinar: Boost Developer Productivity with SUSE Cloud Application Platform](#) [3]

Last week, Troy Topnik and I presented a webinar on how to boost developer productivity with SUSE Cloud Application Platform ? our modern application delivery platform that brings an advanced cloud native developer experience to Kubernetes and enables fast and efficient delivery of cloud native applications at scale. Developers can serve themselves and get apps to the cloud in minutes instead of weeks. SUSE Cloud Application platform eliminates manual IT configuration and helps accelerate innovation by getting applications to market faster. Streamlining application delivery opens a clear path to increased business agility, led by enterprise development, operations, and DevOps teams.

- [SUSE YES Certification Kit for SUSE Enterprise Storage 6 Now Available](#) [4]

With the official release of SUSE Enterprise Storage 6, SUSE Partner Engineering would like to announce the availability of the latest SUSE Enterprise Storage (SES) Certification Kit version 1.2. The SESCK v1.2 has been updated and enhanced to provide certification support for SUSE® Enterprise Storage 6.
