- [ASpeed DRM Driver Ported To Atomic Mode-Setting](#) [2]

The "AST" DRM/KMS display driver that can be used with the many servers supporting ASpeed display hardware now has work pending for atomic mode-setting.

SUSE's Thomas Zimmermann sent out the set of nine patches that convert the existing AST KMS driver into supporting atomic mode-setting as well as universal planes.

- [openSUSE Leap 15.0 Reaches End of Life on November 30th 2019](#) [3]

openSUSE Leap 15.0 reaches the end of life on November 30, 2019. openSUSE Leap 15.0 reaches the end of its support after 1.5 years of life.

openSUSE Leap 15.0 is based on SUSE Linux Enterprise (SLE) 15 resources, released May 25, 2018.
