Submitted by Roy Schestowitz on Tuesday 5th of November 2019 11:34:52 PM Filed under [GNU](#) [1] [Linux](#) [2] [Gadgets](#) [3]

**Privacy
aware
Personal
Assistant**

SUSI.AI aims at bringing a privacy aware personal assistant onto all of your devices. It runs on Android phones, desktop computers, and RaspberryPi based smart speakers. With the switch to Debian/buster, a lot of problems creeped

in and the main application became extremely unstable, crashing in libportaudio2 with very unclear symptoms. Thanks to hint by Felix Yan we were able to fix libportaudio2 locally, and finally got a working and stable image.

During the last summer, a great team of GSoC students have worked on SUSI.AI in general, and on the smart speaker in particular. At the moment SUSI.AI can be installed onto RaspberryPi as well as any Debian based distribution (in particular Debian/buster and Ubuntu 19.04 upward).
