As you know, Mageia 7 was released this summer, followed shortly after by Mageia 7.1. It is time to say goodbye to Mageia 6 ? updates have stopped, including security updates.

As usual, before the upgrade, do a backup of your data and documents.

Why and when did you start using Linux?

2006 Open-Suse, 6 Months later PCLinuxOS my only distro.

What specific equipment do currently use with PCLinuxOS?

Office, Graphics, Multimedia - Jack-Audio, HTML Website build and not so often anymore, 3D CAM

Do you feel that your use of Linux influences the reactions you receive from your computer peers or family? If so, how?

Trying to make people curious by talking about it.

What would you like to see happen within PCLinuxOS that would make it a better place.

What are your feelings?

That Mini Live CD correspond to the Sinn Mini, only for the wide hardware compatibility and peripherals such as printers and scanners.
