- [Canonical makes Ubuntu for Windows SubSystem for Linux a priority](#) [2] [Ed: GNU/Linux volunteers worked hard to make an alternative to Windows and now comes Ubuntu [helping Microsoft make it just an "app" or a "feature" of Windows, with Windows-only "extensions"](#) [3]]

Ubuntu was the first Linux supported by WSL on Windows 10. Since then, many other Linux distros have appeared on WSL. These include Debian, Fedora, Kali, openSUSE, and SUSE Linux Enterprise Server (SLES), and the WSL-specific distribution, PengWin. Now, from a recent Canonical job advertisement, we know Ubuntu's founding company wants to be the leading WSL Linux.

- [Still in preview, but look! You can now develop Azure Sphere apps in Linux ? if you dare](#) [4] [Ed: Several Microsoft lies packed into one article, even the feature image, and they help googlebomb "Linux" to sell proprietary software of Microsoft]

Ominously, Microsoft warns that "your success using different distributions may vary", so Ubuntu it is then. This is preview stuff after all.

- [OAS Expands Its Platform Compatibility with Runtime Support for Linux](#) [5]

Open Automation Software, a well-established IoT Automation Company, has further expanded its platform compatibility with runtime support for Linux. With this recent development, the company aims to offer superior services to customers who have mixed platform environments. Over the years, Open Automation Software has set a benchmark in the

field of industrial automation. Now, the company has expanded its platform compatibility for the enterprises that have both Windows and Linux OS servers.
