Just over 6 months ago, we launched Zorin OS 15, our most advanced and refined operating system ever. Since then, it's been downloaded over 550,000 times around the world. Over 65% of these downloads were coming from Windows and macOS, reflecting our mission to bring the power of Linux to people who've never had access to it before. We would like to take this opportunity to thank every one of you for making this release as big and impactful as it has been.

Today, we're excited to announce that Zorin OS is getting even better with the release of version 15.1. We've paid close attention to your feedback and worked hard to make the desktop experience better for work, learning, playing, and everything in between. We've focused on making the desktop feel even more familiar and user-friendly to new users, especially those moving away from Windows 7 leading up to the end of its support in one month.
