As the year 2020 and a new decade are just around the corner I'd like to thank all our partners, customers, community members, and fellow sailors across the world for being part of the world-changing Jolla Sailfish story for another year. Not only was 2019 a good year but the entire decade has also been a wild ride for us together. Sincere thanks for sailing it with us!

Our dear Sailfish OS, and our company Jolla is steadily approaching an age of 10 years. Most of you know the history. Already from the start we had a bold vision of offering the world a transparent, trusted and privacy-preserving independent alternative for the most personal tech device we use to manage our daily lives ? the smartphone. This is the vision we've been carrying through all stages of the story, from developing and offering Jolla branded devices in the early days, to the licensing business we've been pushing for the past few years.

We are mobile and tech enthusiasts who want to build and develop a mobile operating system we want to use ourselves, and to perfect Sailfish OS for our licensing customers. In parallel we've created the Sailfish X program to carry on the Jolla device heritage for all you like-minded people who want to be independent from the big players, who cherish privacy and data integrity, and who simply just enjoy being boldly different!
