Besides that, a lot of other things happened in the FAI project. Apart from the first report, we got more than 300 detailed reports containing positive feedback. We had several FAI developers meetings and I did more than 40 talks about FAI all over the world. We had a discussion about an alleged GPL violation of FAI in the past, I did several attempts to get a logo for FAI, but we still do not have one. We moved from subversion to git, which was very demanding for me. The FAI.me service for customized installation and cloud images was used more than 5000 times. The Debian Cloud team now uses FAI to build the official Debian cloud images.

I'm very happy with the outcome of this project and I like to thank all people who contributed to FAI in the past 20 years!
