Russian companies Mobile Inform Group (MIG) and Astra Linux have started selling the new MIG T10 x86 tablet powered by the Astra Linux OS, an operating system of domestic origin, reports Cnews.ru. The device is resistant to a wide range of temperatures.

The device corresponds to all the security standards of the Russian security services and the military. It is powered by the tetra-core Intel Appololake N3450 2.2 GHz processor and has a 11,700 mAh battery. The price of the tablet with the pre-installed Astra Linux OS starts from RUB 105,118.
