- **This Week in Linux 93: MATE 1.24, KDE Plasma 5.18, Blender, OpenShot, Evernote, MX Linux**[2]

  On this episode of This Week in Linux, we have monster of a show with new releases from desktop environments like MATE and KDE Plasma to distro news from MX Linux, Ubuntu, Project Trident and Tiny Core. In App News this week, we see new releases from Blender, OpenShot and some interesting news from Evernote. We?ll also talk about some updates from TLP the laptop performance project and Wayland display server protocol. Later in the show, we?ll check out a cool gaming overlay project called MangoHud and we?ll discuss some Legal News related to Mycroft AI and their fight against a ?Patent Troll?. All that and much more on Your Weekly Source for Linux GNews!

- **How Ceph powers exciting research with Open Source** [3]

  As researchers seek scalable, high performance methods for storing data, Ceph is a powerful technology that needs to be at the top of their list. Ceph is an open-source software-defined storage platform. While it?s not often in the spotlight, it?s working hard behind the scenes, playing a crucial role in enabling ambitious, world-renowned projects such as CERN?s particle physics research, Immunity Bio?s cancer research, The Human Brain Project, MeerKat radio telescope, and more. These ventures are propelling the collective understanding of our planet and the human race beyond imaginable realms, and the outcomes will forever change how we perceive our existence and potential. It?s high-time Ceph receives the praise it deserves for powering some of the most exciting research projects on Earth.

  New CEO of the world?s largest independent open source company wants to make SUSE more innovative and help businesses to modernise traditional IT

- **[Every time Windows 10 Updates, it deletes all saved desktop icons, clears my taskbar, deletes all my saved favorites, passwords, and more!](#)** [8]

  Every time my PC updates my desktop wallpaper goes back to default, and all saved icons, favorites, passwords, etc are gone. Every. Single. Time. This is getting tiring and I'm losing so much time at work saving my icons again, paswords, etc. What is going on? Also keeps changing my default printer even when the box is left un-checked, when the computer updates and restarts the box will be checked. Its almost as if the computer is set back to default after every update. Please help. I've tried quite a few things to fix and no luck.

Second Windows 10 update is now causing problems by hiding user profiles [11]

    Windows 10 users are reporting that a second Windows update included in this month's Patch Tuesday is causing problems.

    According to reports, a bug in the KB4532693 update is hiding user profiles and their respective data on some Windows 10 systems.
