Ten years ago today, the Trinity Desktop Environment (TDE) saw the release of its first version (3.5.11). Lot of things have happened since that day but TDE has continued to grow and flourish throughout the years. Today the project is healthier than ever, with dedicated self-hosted servers, regular releases, modern collaboration tools and a vibrant community of users and enthusiasts.

The development team is pleased to celebrate TDE's 10th birthday by announcing the immediate availability of the new TDE R14.0.8 release. TDE is a complete software desktop environment designed for Unix-like operating systems, intended for computer users preferring a traditional desktop model, and is free/libre software.

R14.0.8 is the eighth maintenance release of the R14.0 series, and is built on and improves the previous R14.0.7 version.. Maintenance releases are intended to promptly bring bug fixes to users, while preserving overall stability through the avoidance of both major new features and major codebase re-factoring.
