[1] While perusing my <u>favorite thread</u> [2] of my <u>favorite site</u> [3] I saw <u>this setup</u> [1]. The appropriate witty response failed me as I first thought "You need to get to work son" or "quit wasting time" or perhaps "you should take up computing"... my mind raced around as all I could utter was "holy cow".

Anyway, I thought it was interesting enough to folks that don't visit the gentoo forums [3] to list here.

The owner's, backsu, <u>description</u> [4].
