Edward Shishkin continues pushing ahead with not only maintaining the existing out-of-tree Reiser4 file-system code but also developing Reiser5 seemingly without any major corporate support. Reiser4 and the experimental Reiser5 file-system code were updated on Monday for Linux 5.8 kernel compatibility.

The Reiser4 kernel driver along with the unstable Reiser5 kernel code saw new patch releases for supporting them on the Linux 5.8 stable kernel (Linux 5.8.1 target to be exact).
