A current list of IBM trademarks is available on the Web at https://www.ibm.com/legal/us/en/copytrade.shtml, and select third party trademarks that might be referenced in this document is available at https://www.ibm.com/legal/copytrade.shtml. The registered trademark Linux® is used pursuant to a sublicense from the Linux Foundation, the exclusive licensee of Linus Torvalds, owner of the mark on a worldwide basis. Red Hat®, JBoss®, OpenShift®, Fedora®, Hibernate®, Ansible®, CloudForms®, RHCA®, RHCE®, RHCSA®, Ceph®, and Gluster® are trademarks or registered trademarks of Red Hat, Inc. or its subsidiaries.

Today, IBM celebrates not one but three important milestones in their 20-year-long relationship with Linux and the Open Source community, 20th anniversary of Linux on Z, 5th anniversary of LinuxONE and first anniversary of Red Hat OpenShift on IBM Z and LinuxOne, as the company informs 9to5Linux.

Believe it or not, this month marks 20 years since IBM made the smart choice of opening its proprietary computer technology and announcing it would support Linux on IBM Z, a family of z/Architecture mainframe computers from the Z900 series, which is now used by more than two-thirds of the Fortune 100 companies to protect their highly sensitive data.
