Here's my review on Kubuntu 20.04 LTS Focal Fossa. Two years ago I call it friendly computing, now in 2020, I call it

familiar operating system for everyone. We have so many good news with Kubuntu today and let's go, I hope you enjoy my review.

Kubuntu 20.04 has a lot of benefits and a little of issues. I believe it is a familiar operating system most computer users can afford, by purchasing real Kubuntu laptops or by installing manually, you can push your computing for daily purposes, teaching and graphic designing quickly and comfortably. To complete everything, let's not forget it is a Long Term Support edition which will receive Ubuntu-based updates for five years until 2025 and desktop-based updates until 2023. Win-win solution, nice to everybody, that's Kubuntu Focal for you. That's my review.
