The default shell on most Linux operating systems is called Bash. There are a couple of important hotkeys that you should get familiar with if you plan to spend a lot of time at the command line. These shortcuts will save you a ton of time if you learn them.

Here is the List of Bash Shell Keyboard Shortcuts For Linux Users:

Ctrl + A - Go to the beginning of the line you are currently typing on

Ctrl + E - Go to the end of the line you are currently typing on

Ctrl + L - Clears the Screen, similar to the clear command

Ctrl + U - Clears the line before the cursor position. If you are at the end of the line, clears the entire line.

Ctrl + H - Same as backspace

Ctrl + R - Let's you search through previously used commands

Ctrl + C - Kill whatever you are running

Ctrl + D - Exit the current shell
