Submitted by Rianne Schestowitz on Thursday 1st of April 2021 02:35:07 AM Filed under [MDV](#) [1]

Considering the complete lack of bugs in urpm and in the RPM package format, which we've grown tired of, The Executive Committee has approved the switch to Debian package manager, apt.

We will rebuild Cauldron to adopt the .deb package to have it in place for Mageia 9.

We will also adopt the Arch Installer, ditch Mageia Control

Centre for raw conf files, and will also suppress urpm, rpm, dnf, pagure, iurt and mock.

Infra will be migrated to a fork of Debian build system.
