The LibreOffice Documentation community announces the immediate availability of the Calc Guide 7.1, with additions based on the improvements in LibreOffice Calc 7.1, which was released in February this year.

The Guide is the volunteer effort of many members of the documentation community. Revisions and enhancements on the contents are the work of Rafael Lima from Brazilian community, Martin Van Zijl and Kees Kriek from the Dutch community, Celia Palacios from the Hispanic language community. A special mention to Yusuf Keten from the Google Summer of Code program on new extensions and templates dialogs, to Steve Fanning for his editorial review and to Jean Hollis Weber for her improvements and organization of the text. The LibreOffice Calc Guide 7.1 update activities was coordinated by Felipe Viggiano from Brazil.
