Georges Basile Stavrakas Neto: Dark & light style selector in To Do

There?s a lot to be done to make To Do actually useful. The inbox view is essentially useless as it is right now. It really needs more system-wide integration points. The week view could be more engaging and time-oriented than it currently

is. I would like to add a command bar too, at some point.

However, we haven't seen new designs for some time now, and To Do is off from designers' spotlight for many years now. If you're design-oriented, we could really use your help!
