# Virtual Hosting With Proftpd And MySQL (Incl. Quota) On Debian Etch

By *falko*

Created 29/04/2007 - 9:08am

Submitted by falko on Sunday 29th of April 2007 09:08:39 AM Filed under [HowTos](#) [1]

[This document](#) [2] describes how to install a Proftpd server that uses virtual users from a MySQL database instead of real system users. This is much more performant and allows to have thousands of ftp users on a single machine. In addition to that I will show the use of quota with this setup.
