I find it hard to explain why I love PCLinuxOS as much as I do, especially considering the other day when I decided to drop into Ubuntu to perform some basic tasks. PCLinuxOS is an excellent release and PCLOS2007 is looking like a real contender for most usable Linux 2007. Let's see how test release 4 behaves.

I last visited PCLinuxOS when reviewing the beta 2 release in mid-March. This test 4 edition was released only a couple of days ago so it only seems right to give one of the most usable distros around another poke.

PCLinuxOS has always focused on giving a more complete out of the box experience while remaining true to offering an intuitive user experience; suitable for those who aren't confident in the Terminal.

Aesthetics

It's always been a handsome release and there's little to say once you've seen the screenshots:
