# Installing ModSecurity2 On Debian Etch

By *falko*

Created 08/07/2007 - 10:08am

Submitted by falko on Sunday 8th of July 2007 10:08:25 AM Filed under [HowTos](#) [1]

This article shows how to [install and configure ModSecurity \(version 2\) for use with Apache2 on a Debian Etch system](#) [2]. ModSecurity is an Apache module that provides intrusion detection and prevention for web applications. It aims at shielding web applications from known and unknown attacks, such as SQL injection attacks, cross-site scripting, path traversal attacks, etc.
