KDE Plugin in the Official OpenOffice.org Packages

By *srlinuxx*

Created 22/07/2005 - 5:31pm

Submitted by srlinuxx on Friday 22nd of July 2005 05:31:07 PM Filed under [KDE](#) [1]

A year and a half after launching the KDE.OpenOffice.org Integration Project, the KDE plugin with the Native Widget Framework has become part of the official OpenOffice.org development packages. Developer [snapshot m118](#) [2] is the first of the towards-2.0 milestones that contains it.

Please keep in mind that if you use a Linux distribution with OpenOffice.org packages based on ooo-build (Wiki), you most probably already have this. ooo-build also contains additional KDE integration features like Crystal icons for OOo (big thanks to Nuno Pinheiro and Robert Wadley!), and KDE file dialog.
