"Many people are curious about the inner workings of Google, but they are mostly interested in keeping it a secret. So, any information we can glean comes from "black box" analysis. Recently, I wrote a short article that explains how I wrote some simple code that can instantly create PDFs of entire books from Google Print. Maybe some k5ers have more ideas on how to expand the concept, but, as you'll soon find out, I probably can't help in the efforts. Read on ..."

Introduction

Many people are interested in how Google works, and Google is mostly interested in keeping it a secret. I'm going to tell you a few things I've learned about Google by playing around with their software . It's not terribly advanced, but I think it's interesting nonetheless. The first thing I will cover is Google's cookie, and then I will explain how I used this information to exploit Google Print." [Full Story](#) [2].
