I have made several linux cheat sheets to speed up the learning process of some tools.

Recently I decided to put them on my blog.

Here is a link to all the cheat sheets on my blog:

[cheat sheets at catonmat \(my blog\)](#) [2]

They include:

- \* [awk \(awk, nawk and gawk\) programming language cheat sheet](#) [3],
- \* [sed, unix stream editor, cheat sheet](#) [4],
- \* [ed, interactive unix text editor, cheat sheet](#) [5],
- \* [perl's special variable cheat sheet](#) [6],
- \* [perl's pack/unpack and printf/sprintf function cheat sheet](#) [7],
- \* [screen vt100 terminal emulator cheat sheet](#) [8],
- \* [bash vi editing mode \(readline\) cheat sheet](#) [9], and
- \* [bash emacs editing mode cheat sheet](#) [10].
- \* [definitive guide to bash command line history \(with cheat sheet\)](#) [11].

Tell me what you think and I hope you find them useful!

ps. I have 5-10 more to publish, if you are interested, check back and possibly [subscribe to my posts via rss feed](#) [12]

Sincerely,

Peteris Krumins
