Submitted by srlinuxx on Wednesday 9th of April 2008 10:19:22 PM Filed under [Drupal](#) [1]

Drupal 6.2, a maintenance release that fixes problems reported using the bug tracking system, as well as security vulnerabilities is now available for download. The security issues identified were in code new to Drupal 6, and are therefore not applicable to sites running on Drupal 5.

Upgrading your existing Drupal 6 sites is strongly recommended. There are no new features in this release, but we fixed some notable performance issues too. \
